Commissioner for Patents Washington, D.C. 20231

Sir:

Responsive to the Office Action of <u>December 19, 2001</u>, the following amendments and remarks are submitted in connection with the above-identified application.

## **IN THE CLAIMS:**

Please amend claims 1 and 20 as follows. Attached hereto is a marked-up copy of the claims in amended form.

1. (Thrice Amended) A connector for a module that connects the module, the module having a semiconductor chip mounted on a rectangular board and a conductive pad on a front side of the board, to a printed circuit board in a position wherein a plane of the board is substantially parallel to the printed circuit board,

said connector comprising:

a connector body having a receiving part that extends along the front side of the module being in a connection position, and a groove provided in a rear face thereof into which the front side of the module is inserted, said groove having contacts provided therein which contact the conductive pad on both a top surface and a bottom surface of the module
